INVERTER

A Better Life, A Better World

Panasonic has produced over 100 million* air conditioning and heat pump units worldwide.

Global Brand

Our global brand serves over 100 countries in all climate zones around the world.

Our air conditioner designs consider local climate characteristics and are used in a wide range of extreme hot to extreme cold regions and countries.

Outdoor units are affected by extreme weather conditions which also affects the units performance. In extreme cold climate and heavy snow fall conditions it is necessary to protect the outdoor unit from freezing. Panasonic has developed special knowledge and technology for cold climate regions including Siberia and North America.

Panasonic is a global pioneer in extreme cold climate heat pump design and installations.

* As of the end of 2014 (According to our research)

Our Evolution

Forever and ever.

1958

Our first home cooler is launched.
A window-type.

1965

Launched indoor and outdoor split system

1969

Launched wall mounted indoor unit

1972

Launched heat & cool air conditioner.
Launched Heat Pump mini split making heating & cooling possible year-round.

1981

Launched low ambient heat pump units that provide heat in extreme cold climates.

1983

Launched inverter air conditioner.

2008

First model equipped human sensor launched.

2010

First model equipped ECONAVI launched.

2014

XE series -15°F heat operation

2020

ClimaPure XE series with nanoe™ X

Experience a fresher and more comfortable indoor environment

7 effects of nanoe™ X air purification technology

Deodorizes Odors	Inhibits 5 types of pollutants* Bacteria & viruses Mold Allergens Pollen Hazardous substances	Moisturizes Skin & hair
---------------------------------------	--	--

*nanoe™ X reduces the concentration of select pollutants, mold, allergens, pollen, PM2.5, and odors and the growth of certain viruses and bacteria, but does not prevent them.

What is **nanoe™**?
 nano-technology + electric =

nanoe™ X is nano-sized electrostatic atomized water particles that are rich in OH radicals.

nanoe™ X is the next generation of nanoe™ technology and is generated from moisture in the air that contains highly reactive components known as hydroxyl (OH) radicals, which are effective at suppressing pollutants and odors.

4.8 trillion OH radicals / sec

How **nanoe™** works?

Deodorizes Odors

nanoe™ X reaches odor in fabric

OH radicals break down odor-causing substances

Deodorizes smells in fabric

Inhibits Airborne and Adhered Pollutants

nanoe™ X reaches pollutants in fabrics

OH radicals take hydrogen away from pollutants

OH radicals transform hydrogen to inhibit the activity of pollutants

Helps maintain skin moisture

Using existing moisture already in the air, nanoe™ X hydrates the sebum (produced by sebaceous glands to lubricate the skin) on the skin to help prevent loss of moisture.

[28 days later] Leads to smoother, well hydrated skin.*

*Test Laboratory: FCG Research Institute Inc. Report no. 19104

nanoe™ X inhibits both airborne and adhered pollutants and odors in the home

✓ Helps create an environment that's clean and safe for babies

The carpets where babies spend much of their time conceal a great deal of mold, bacteria, viruses and allergens deep in their fibers. nanoe™ X inhibits these pollutants, helping to make carpets cleaner and safer for babies.

✓ Makes homes more comfortable for families with pets

Mites and dander from pets are a major cause of allergies in the home. nanoe™ X not only effectively inhibits these allergens but also eliminates many odors that permeate mattresses, blankets and more.

✓ Keeps the living room fresh and inviting

The smell of unpleasant odors tends to permeate furniture and curtains over time. nanoe™ X inhibits odors, leaving the air in your living room fresh and inviting.

✓ Protects your valued clothing and other stored items

Air tends to become stale and humid inside closets, encouraging the growth of mold. nanoe™ X inhibits the growth of mold to help protect your clothing and other stored items.

✓ Inhibits harmful substances in smaller than 2.5 microns brought in from outside

Harmful substances in smaller than 2.5 microns (PM2.5) and pollen that are thought to cause asthma, bronchitis and other health issues tend to cling to your clothing and hair when you come in from outside. nanoe™ X breaks down and inhibits these substances.

✓ Moisturizes skin and hair for a little extra self-care

nanoe™ X helps keep your hair and skin moisturized while you sleep or spend time with your family. nanoe™ X hydrates the sebum on the skin to prevent the loss of moisture.

VERIFIED
ZERO OZONE
DOES NOT EMIT MORE THAN
0.005PPM AS TESTED
PER UL 867

Ozone concentration during the nanoe™ X generating mode has been verified by California Air Resources Board (CARB) and INTERTEK respectively per authorized testing standards.

- Standard value of California Air Resources Board (CARB): 0.05ppm or lower
- Standard value of INTERTEK "Verified Zero Ozone": 0.005ppm or lower

Panasonic's Advanced Air Purification System

Panasonic's nanoe™ Technology is a revolutionary air purification system that helps keep your living space fresh and clean for you and your family.

The effects of nanoe™ Technology are recognized by experts in each field

Recommended for use in facilities such as medical institutions where greater cleanliness is required

Professor Masafumi Mukamoto

Osaka Prefecture University
Veterinary Infectious Disease Studies

Various types of molds enter houses along with people and air. Even if preventive action is taken in our everyday lives, it is often very difficult to inhibit the growth of mold, especially in humid environments. With nanoe™ X, we have experimental results*1 that show we can inhibit the growth of the types of mold commonly found in various places in the house. As nanoe™ X is also capable of inhibiting invisible bacteria and viruses that exist in our living environment. I recommend that equipment incorporating nanoe™ X technology be placed in buildings where cleanliness is required, such as in schools, childcare facilities and medical institutions.**

*1 Experimental results show that nanoe™ X is effective in inhibiting the growth of the following types of mold commonly found in homes: Cladosporium, Aspergillus, Penicillium, Alternaria, Fusarium, Eurotium, Mucor, and Stachybotrys.
** The above indications and statements are made in reference to available information.

Hope for the creation of more comfortable spaces for those who have problems with asthma or atopic dermatitis

Professor Masahiro Sakaguchi

Azabu University School of Veterinary Medicine
Medicine Department of Veterinary Medicine

We have experimental results that show nanoe™ X is capable of inhibiting allergens, such as pollen and dust mites. It is important to take precautions against the allergens that we inadvertently inhale in our daily lives.

As nanoe™ X is effective in inhibiting invisible allergens, we can expect it will create a cleaner environment.**

The Effectiveness of nanoe™ X Technology

Cigarette smoke odor¹

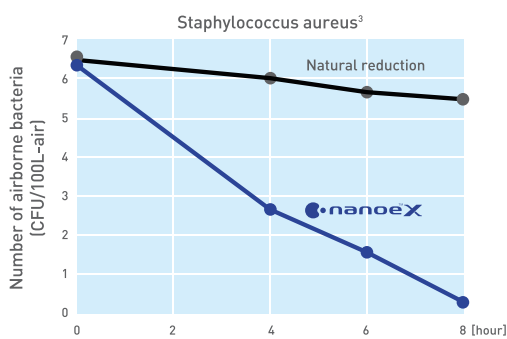

nanoe™ X can reduce cigarette smoke odor intensity by 2.4 levels in 12 minutes.

Pet odor²

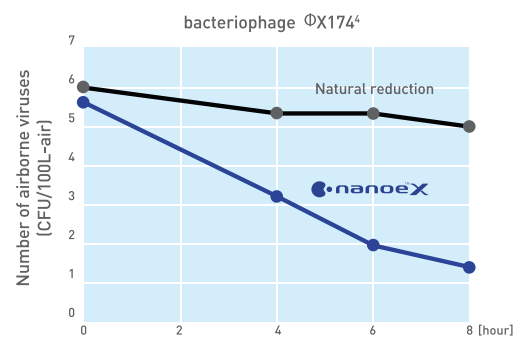

nanoe™ X reduced pet odor intensity by 1.5 levels in 1 hour

Airborne bacteria

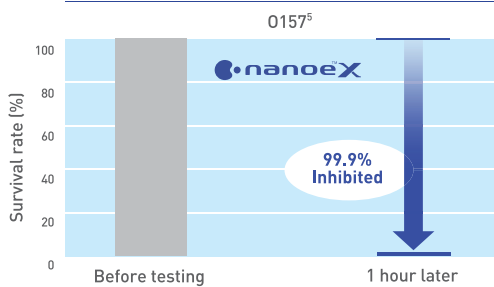

Inhibited 99.7% in 4 hours

Airborne viruses

Inhibited 99.7% in 6 hours

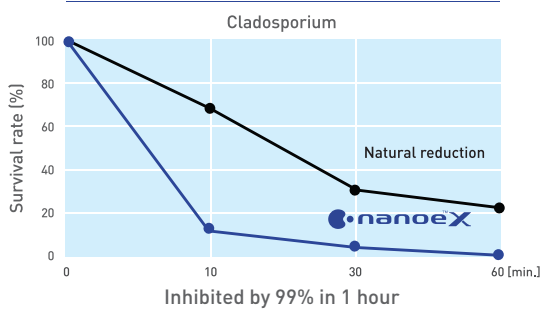

Adhered bacteria

Adhered viruses

Airborne mold⁷

Inhibited by 99% in 1 hour

Adhered mold⁸

*nanoe™ X reduces the concentration of select pollutants, mold, allergens, pollen, PM2.5, and odors and the growth of certain viruses and bacteria, but does not prevent them.

¹<Cigarette smoke odor> [Test org.] Panasonic Product Analysis Center [Test method] Verified using the six-level odor intensity scale method in an approximately 23m³ sized test room [Deodorization method] nanoe™ released [Test substance] Surface-attached cigarette smoke odor [Test result] Odor intensity reduced by 2.4 levels in 12mins (4A433-16015-N04)

²<Pet odor> [Test org.] Panasonic Product Analysis Center [Test method] Verified using the six-level odor intensity scale method in an approximately 23m³ sized test room [Deodorization method] nanoe™ released [Test substance] Surface-attached pet odor [Test result] Odor intensity reduced by 1.5 levels in 1 hour (4A433-160315-A34)

³<Airborne bacteria (Staphylococcus aureus)> [Test org.] Kitasato Research Center for Environmental Science [Test method] The number of bacteria is measured after direct exposure in an approximately 25m³ sized airtight test room [Inhibition method] nanoe™ released [Test substance] Airborne bacteria [Test result] Inhibited by at least 99.7% in 4 hours (24_0301_1)

⁴<Airborne virus (bacteriophage ΦX174)> [Test org.] Kitasato Research Center for Environmental Science [Test method] The number of virus is measured after direct exposure in an approximately 25m³ sized airtight test room [Inhibition method] nanoe™ released [Test substance] Airborne virus [Test result] Inhibited by at least 99.7% in 6 hours (24_0300_1)

⁵<Adhered bacteria (O157)> [Test org.] Japan Food Research Laboratories [Test method] Measured the number of bacteria adhered to a cloth in an approximately 45L sized airtight test room [Inhibition method] nanoe™ released [Test substance] Adhered bacteria [Test result] Inhibited by at least 99.99% in 1 hour (208120880_001)

⁶<Adhered virus (Influenza virus H1N1 subtype)> [Test org.] Kitasato Research Center for Environmental Science [Test method] Measured the number of virus adhered to a cloth in an approximately 1m² sized airtight test room [Inhibition method] nanoe™ released [Test substance] Adhered virus [Test result] Inhibited by at least 99.9% in 2 hours (21_0084_1)

⁷<Airborne mold (Cladosporium)> [Test org.] Japan Food Research Laboratories [Test method] Measured the number of mold adhered in an approximately 23m³ sized test room [Inhibition method] nanoe™ released [Test substance] Airborne mold [Test result] Inhibited by at least 99% in 1 hour (205061541-001)

⁸<Adhered mold (Aspergillus)> [Test org.] Japan Food Research Laboratories [Test Method] Measured the mold adhered to a cloth [Inhibition method] nanoe™ released [Test substance] Adhered mold [Test result] Inhibited by at least 99.5% in 8 hours (11038081001-02)

Built-in Wi-Fi with Panasonic Comfort App: Convenient centralized control

Advanced smartphone control for ClimaPure XE series

Control air source heat pump operation with Panasonic Comfort App plus additional functions only available through the Cloud from wherever and whenever. One user can manage up to 200 units and also set up different user rights. Energy monitoring is also allowing opportunity to learn how to reduce the operating cost even more.

1 Smart Control

In control of cooling and heating comfort anytime, anywhere.

Connect & control operation

- 20 units per location and up to 10 different locations
- Transform multiple remote controls into one device

Manage multiple units at once

- Turn on all AC units at the same time or by group settings
- Set weekly timers for multiple units to cater to your daily routines

2 Smart Comfort

Easily manage your comfort and air quality.

Adjust set temperature

Set temperature by monitoring real time indoor and outdoor temperatures.

Pre-heat or cool.

Control your house or office comfort before you arrive!

nanoe™ X¹

Activate nanoe™ X, the advanced technology to deodorize and create a healthier environment.

3 Smart Efficiency

More comfort with less wasted energy.

Energy usage analysis²

Monitor energy consumption based on different temperature settings.

Energy usage comparison (day/week/month/year)

Compare energy usage history of AC units for better budget planning.

4 Smart Assist

Be informed of breakdowns.

Error codes notification and identification³

Launch the App to check error codes for effortless troubleshooting. Help technicians to easily identify the issues.

User's control right

Register multiple users. Set administrator rights and assign users access.

1) nanoe™ X is available in certain series.

2) Estimated energy consumption data accuracy depends on power supply quantity.

3) Contact trained technicians to perform any repairing/service.

Easily control and access all features of remote control anytime, anywhere.

New possibilities, new applications

Families: Different users can be set up, such as each child can manage their own room. In second homes, rooms can be remotely pre-cooled or pre-warmed, or turned off if needed.

Multi tenant owner: The ability to manage up to 200 units with just one smartphone. It allows for quick and efficient maintenance through remote error codes and the knowledge of consumption.

Small and medium sized offices: Owner can control different rooms of the office easily and give unit by unit access to their staff. The app provides information to know where energy might be wasted for heating and cooling and promoting best comfort practices.

Smart control at your fingertips

With Panasonic Comfort App, the user can manage all functions of the heat pump such as nanoe™ X, air flow direction, speed, temperature setting, mode, plus more.

Scalability and users management

Easy to include additional units and locations, as well as the ability to include several users with different access rights. This creates more possibilities to manage the family home, a second house and also provides opportunities for small/medium sized offices or multi-tenant properties.

Energy monitor and statistics

Knowing the energy each unit uses when operating is key to see opportunities to reduce the energy bill. The Panasonic Comfort App stores the energy consumption* of each unit, which can then be shown in easy and powerful statistics graphs.

With the weekly timer the operation can be adjusted to optimize the usage of the energy.

*Estimated energy consumption data accuracy depends on power supply quality.

New voice control. Words do more than actions.

Operate the air with your voice

Enjoy the convenience of accessing these four basic operations with just your voice.*

*Functionality is available for ClimaPure™ CS-XE*WKUA model series. See us: panasonicvac.com

1 Turn on/off air conditioner

Convenient control for blissful rest.

Turn on/off AC with ease when preparing a comfortable space for your little ones.

3 Adjust temperature

Easy control for uninterrupted quality time.

Adjust temperature to your comfort with a simple voice command.

2 Change mode

Extra help when you have a hectic day.

Conveniently change your AC operation mode to cool / heat / auto when your hands are full.

4 Check current status

Hands-free comfort for the whole family.

Easy access for the elderly to check current AC operation status and adjust AC settings.

Control without boundaries and get hands-free help to fully access the features of your air conditioners. Maximizing your comfort is now a breeze with our Network-Enabled heat pumps with Panasonic Comfort App and voice control.

Get multiple things done with your voice

Simplify your day with your personalized routine by grouping individual actions.

Schedule your routine with your voice

With the routine function, you can customize voice commands and control multiple voice-controlled devices including our network-enabled heat pumps to help you with your personalized routine.

How to setup

To sync with your voice assistant, first the AC unit has to be registered in Panasonic Comfort App.

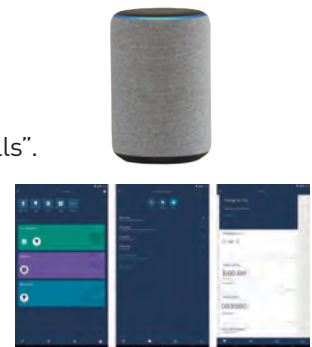

How to sync Panasonic Comfort App with the Google Home.

1. Open the Google Home App.
2. Tap “Account”.
3. Choose “Set up or add”.
4. Choose “Set up device”.
5. Choose “Works with Google; Have something already set up?”
6. Search for “Panasonic Comfort”.
7. Insert your “Panasonic Comfort” username and password.

How to sync Panasonic Comfort App with the Amazon Alexa.

1. Open the Amazon Alexa App.
2. Tap “Devices”.
3. Choose “Your Smart Home Skills”.
4. Choose “Enable Smart Home Skills”.
5. Search for “Panasonic Comfort”.
6. Insert your “Panasonic Comfort” username and password.

Compatible device and browsers as of March 2020

1. Android™ 4.4 KitKat® or above
2. iOS 9.0 or above

Please note:

- This is not a definitive list of all compatible devices, other similar devices which use supported Operating Systems should also work either via dedicated Apps. Please note that user experience may vary slightly depending on hardware and software combination
- Google, Android, Google Play, and Google Home are trademarks of Google LLC. KitKat is a registered trademark from Nestlé S.A.
- Amazon, Alexa and all related logos are trademarks of Amazon.com, Inc. or its affiliates
- Availability of Voice Assistant services varies depending on country and language
- More information about set up procedures: <https://aircon.panasonic.com/connectivity/application.html>

Rugged design that continues to operate high performance even in cold climate of -15°F

PRECISE

Precise design

Components arranged in an orderly manner are proof of high-precision and careful finishing. The compressor, which is the heart of the system, is wrapped in insulation to provide soundproofing and reduce condensation.

1 High-Efficiency Compressor

High-performance compressor with wide power output range operates accurately with less than 1 ampere for precise operation.

2 Inverter Technology

Advanced drive technology adjusts precise compressor motor rotation. During the start-up phase, the inverter signals for powerful, high-speed rotation; during the run phase the inverter smoothly shifts the compressor to a low speed rotation for energy savings. This maximizes compressor performance and optimizes highly efficient operation.

Low Vibration

Anti-vibration rubber mounts on the compressor legs absorb impact and improves durability.

3 High-Efficiency Blades

Frost on heat exchanger is frequent in cold climates. The three blade, high static pressure design moves air quietly and evenly even under harsh conditions and provides high-efficiency operation.

Quiet

Smooth rotation and low vibration ensure quiet operation and durability.

Silicone Coating

The printed circuit board, the brains of the heat pump is fully coated with silicone to prevent malfunction from deterioration.

4 Blue Fin Condenser

Blue Fin corrosion resistant coating is applied to each fin. This assures longer life of the heat exchanger protecting it from corrosion, salt air and moisture from rain & melting snow.

3 layer structure 3 times longer lasting

Note: According to Panasonic test results.

5 Base Pan Heater/ Multiple Drain Ports

A heating element placed around the base pan prevents freezing condensate inside the outdoor unit. Multiple drain holes assist prompt drainage.

6 Powder Coated Finish

An industrial grade paint used on exterior finishes for guardrails, automobile parts provide corrosion resistance and durability.

Reliability and exceptional quality with over 200 quality assurance tests

A rugged design ensures that the heat pump will continue to keep the room comfortable, and provide reliable operation for many years. Panasonic believes this is the true value of a heat pump and the reason we subject them to a wide range of stringent durability tests.

- Long-term Durability Test
- Compressor Reliability Test
- Operating Test in Harsh Conditions
- Waterproof Test

Panasonic conduct tests under conditions that are much more severe than actual operating conditions.

The outdoor unit is provided with IPX4 waterproof compliance. Also, an operating durability test has been conducted at a temperature up to 130°F down to -13°F in test chamber.

Panasonic simulates impacts, vibrations and other external conditions that heat pumps might receive during transportation. We assure that the quality and performance at the time of the final product inspection are maintained when the product reaches the user's home.

- Drop Test
- Vibration Test
- Warehouse Stacking Test

Even with the large impacts during transportation, the product packaging has been strengthened to prevent it from being damaged.

We place a weight on top of the test package and leave it in a room at high-temperature and humidity. After this warehouse simulation test, the product is checked for proper operation.

Heat Pumps should keep each person in the room comfortable without making their presence known. They should work totally in the background, using their strength to create and maintain a comfortable environment. We build this hidden strength into our heat pumps, and test them repeatedly from this viewpoint.

- **Noise Test**
- **Environmental Test**
- **EMC (Electromagnetic Compatibility) Test**
- **Remote Control Usability Test**

An actual heat pump is operated in a test room that simulates a standard living room. The test makes it possible to confirm optimum performance level under ever-changing conditions.

A variety of tests are conducted to judge the visibility of the button colors, operating ease. The remote control is also subjected to a 1.5-meter drop test from various angles.

Panasonic continues to offer the highest quality with the lowest possible environment impact. The fundamental principles of Panasonic products naturally apply our heat pumps. In order to live up to our reputation for quality, we work to overcome challenges and devote maximum efforts all over the world.

- **International Standard Quality**
- **Sophisticated Production Process**

Panasonic heat pumps comply with all necessary leading industrial standards and regulations required for the market in each country.

Panasonic factories reduce CO2 emissions and conduct regional-based environmental communication activities to contribute to both the global environment and the local communities.

With Panasonic, heating and cooling are all-in-one providing year-round comfort

Superb comfort

PRECISE CONTROL

Panasonic inverter technology continually adjusts its compressor rotation speed to provide maximum performance at all times. This precise operation enables quick cooling or heating while reducing power consumption compared to conventional non-inverter units.

Reduces Electricity Consumption

Panasonic inverter air conditioners/heat pumps are designed to give you exceptional energy savings while ensuring you stay comfortable at all times.

Constant Comfort

Precise temperature control with a wide power output range enables an Inverter air conditioner/heat pump to meet different room occupancy levels, providing constant comfort.

All seasons

YEAR-ROUND USE

The air conditioning heat pump consists of a single or multiple indoor units and a single outdoor condensing unit. The indoor and outdoor units are connected by refrigerant lines that cycle refrigerant between the indoor and outdoor units. The direction of the refrigerant can be switched which changes operation between heating and cooling. This switching change is done with a simple button push on the remote controller and heating and cooling comfort is provided year-round.

At heating operation Simply said, heat is transferred from outdoors to indoors using a compressor and high pressure, high temperature refrigerant. Cool air is drawn into the indoor unit and Warm air is released into the room. The refrigerant cycle continually repeats.

At cooling operation Simply said, heat is transferred from indoors to outdoors using a compressor and high pressure, high temperature refrigerant in a reverse cycle from heating. Warm moist air is drawn into the indoor unit and Cool dry air is released into the room. The refrigerant cycle continually repeats.

Quick Cooling and Heating

Panasonic Inverter air conditioner/heat pump can operate with higher cooling/heating power the room faster than non-inverter models.

Whisper Quiet Operation

The indoor operating noise has been reduced by 5dB as the Inverter constantly varies its output power to enable more precise temperature control.

Advanced Inverter & ECONAVI Technology

Optimum Performance while reducing Energy Usage

Panasonic inverter technology constantly adjusts its compressor rotation speed to provide maximum performance at all times. This precise operation enables quick cooling or heating while reducing power consumption compared to conventional non-inverter units.

Reduces Electricity Consumption

Panasonic inverter air conditioners/heat pumps are designed to give you exceptional energy savings while ensuring you stay comfortable at all times.

Constant Comfort

Precise temperature control with a wide power output range enables an inverter air conditioner | heat pumps to meet different room occupancy levels, providing constant comfort.

Quick Cooling and Heating

Panasonic Inverter air conditioners | heat pumps can operate with higher cooling/heating power during the start-up period to cool/heat the room faster than non-inverter models.

Whisper Quiet Operation

The indoor operating noise has been reduced by 5dB as the Inverter constantly varies its output power to enable more precise temperature control.

INVERTER

• Wider Output Power Range

What's ECONAVI?

High-precision sensor technology allows efficient, automatic operation to match room conditions. This keeps everyone comfortable while saving energy.

What does ECONAVI detect?

EXAMINE

- Level of activity.
- Human presence.

EVALUATE

- Changes in human activity.
- Changes in human presence.

EXECUTE

- Low activity: Auto increase set temperature.
- Absence: Auto increase set temperature.

ECONAVI

Advanced ECONAVI Technology

Energy Saving and Comfort through Sensor Technology

ECONAVI SENSOR

1. Absence Detection **Human Activity Sensor**

Reduces cooling operations when no activity is detected.

Switches from high operation to reduce cooling.

2. Activity Detection **Human Activity Sensor**

When activity is detected, sensors start working to efficiently cool the zone.

Switches from high to mild cooling.

Air Conditioner | Heat Pump Line-Up

Your Best Choice in Mini Split Air Conditioning and Heat Pump Systems

Since 1983, Panasonic Mini Split Air Conditioner and Heat Pump products offer a wide range of versatile solutions for cooling and heating requirements for single or multiple rooms. The indoor unit (evaporator) is mounted inside a room and connected to the outdoor unit (condenser) via refrigerant lines and inter-unit wiring through a 3-1/2" opening in the wall. Since no ductwork is required, installation is simple, fast and efficient. Ducted models are also available.

The indoor unit has been uniquely designed to provide whisper-quiet operation while delivering comfort throughout the room. Panasonic Mini Split Systems are stylish and provide the quality and reliability you can count on.

All Multi-Zone Systems require a minimum 2 indoor units installed.
When selecting Multi-Zone please consider System Capacity and Indoor Unit Combinations. See pages 42 and 43.

XE Models: AHRI certification on all single zone configurations and when paired with CU-3E19RBU-5 only.

SINGLE ZONE: Residential and Light Commercial Applications

Features

nanoe™ X Air Purification System

Advanced nanoe™ X air purification technology with no maintenance required. [See pages 4-9]

Wi-Fi Options

Control heating and air conditioning through easy-to-use smartphone app.

- XE with Built-in Wi-Fi [See pages 10, 11, 52]
- Other models optional Wi-Fi adapter [See page 53]

Auxiliary Heat Connect

Optional auxiliary heater connection kit to turn on/off an auxiliary heater device during extreme low ambient conditions.

ECONAVI Sensor

Automatic sensor for energy efficiency and comfort. Absence & Activity Detection, Area Search

Dry Mode

By coupling compressor and fan operation, intermittent operation can be precisely controlled according to room temperature, so that air is efficiently dehumidified.

Blue Fin Condenser

Condensers can take a beating from exposure to salty air, rain and other corrosive factors. Panasonic has extended the life of its condensers with an original anti-rust coating.

Tested for 2,000 salt spray hours.

Room Freeze Protection*

Room Freeze Protection mode helps prevent plumbing damage due to sub-Freezing Temperature. This mode automatically turns on the compressor for heat pump operation if the room temperature falls to about 46°F.

*This function may not be performed if the unit is not powered, or if the unit is unable to operate such as in protection mode. Please consult with the HVAC installers or professional for details.

Microprocessor-Controlled Operation

Microprocessor control ensures that the temperature and humidity levels in the room are comfortable.

Wireless Remote Control

Panasonic's infrared Remote Control with an easy-to-read LCD Display, gives the user the capability to adjust & set: temperature, sweep (louver control), fan speeds, timer and more, for complete automatic operation.

Self-Diagnosing Function

Units are equipped with Self-Diagnosing Function (methods are different depending on the models). This makes it easier to diagnose malfunctions, greatly reducing service labor (Wired remote controller).

(Example of CZ-RTC2)

5 Fan Speeds and Automatic Fan Operation

Convenient microprocessor control automatically adjusts fan speed to High, Medium or Low, according to room temperature to maintain a comfortable airflow throughout the room.

Air Sweep Control

The air sweep function moves the louver up and down in the air outlet, directing air in a "sweeping" motion around the room.

Base Pan Heater

Exterios XE models include a base pan heater that helps prevent freezing condensate and allows very low ambient operation.

Automatic Heating and Cooling Changeover

After setting the temperature and functions you desire, just relax. If the room temperature is higher than the set temperature, cooling operation begins. If the room temperature is lower than the set temperature, heating operation begins. During normal thermostat cycle operation, cooling and heating operations automatically change in accordance with set temperature, time and room temperature (Single Zone Heat Pump unit only).

Hot Start Heating System

Right from the start, air is warm and comfortable. The Hot Start Heating System helps prevent any cold blasts at the beginning while the heat pump is warming up.

24-hour Clock with ON/OFF Program Timer

The remote control unit allows you to set a wide variety of timer-based operations. Such functions include automatic ON/OFF with a timer setting, same time ON/OFF every day, ON timer, OFF timer and Combination timer.

1-hour OFF Timer

When this button is pushed either while the unit is operating or while it is stopped, the unit will operate for one hour, then switch off automatically.

Filter Sign

Filter sign informs you when filter maintenance is necessary.

XE/E series with CZ-RD516C-1

Automatic Restart Function after Power Failure

Built-In Drain Pump

Max. head 20 inches from the discharge of the indoor unit. Condensation pump is only for allowing drain line to meet minimum gravity flow requirements.

Low Ambient Operation

Low Ambient heating operation models range from 5°F to -15°F

Electric Refrigerant Control Valve

The circulation volume of the refrigerant is controlled by a pulse type electric control valve. In order to attain optimum efficiency, when the power is switched ON, the opening degree of the electric control valve is controlled between 90 and 480 steps.

Quiet Mode

LOW, low fan speed for extra quiet operation.

Stage 2 Filter

PM2.5 to inhibit up to 90% of dust particles.

Anti-Microbial treated to inhibit the growth of mold and mildew.

Test Comparison

	Microbial Growth Rating	
	7 days	28days
Anti-microbial Filter	No growth	No growth
Normal Filter Paper	60% growth	60% growth

*Tested per ASTM G21-96 equivalent

The latest breakthrough in energy efficiency and high performance

ClimaPure™ XE

WALL MOUNTED HEAT PUMP COLD CLIMATE SERIES

The new ClimaPure™ XE ductless heating and air conditioning system features nanoe™ X — a built-in air and surface purification technology that provides a comfortable environment for occupants by reducing pollutants and odors. nanoe™ X penetrates deep into the fibers of carpets and furniture to inhibit pollutants and odors. Featuring whisper-quiet heating and cooling and advanced built-in air purification technology, the XE series sets a new standard for a comfortable indoor environment.

Low Ambient Heating -15°F

Operational heat capacity down to -15°F provides heating in extreme cold regions. Low Ambient performance specifications qualifies ClimaPure™ XE series for most air source heat pump rebate programs.

nanoe™ X Air and Surface Purification

nanoe™ X generates large quantities of hydroxyl radicals that are distributed throughout the room to reduce air and surface pollutants and odors resulting in a cleaner living environment. See pages 4-9. ClimaPure™ XE series also offers an optional CZ-SA31P filter to further reduce micro-particles (PM2.5).

Base Pan Heater

Base Pan Heater is included with ClimaPure™ XE models and operates during defrost cycles to help prevent frozen condensate. Multiple drain holes to help prevent frozen condensate build up.

Built-in Wi-Fi with Panasonic Comfort App

Manage all function of the mini-split from any location using ClimaPure™ XE series Built-in Wi-Fi with Panasonic Control App. Set up user rights to manage scalability up to 200 units in 10 locations.

Room Freeze Protection

Helps prevent plumbing damage due to sub-freezing temperatures. Automatically turns on compressor for heat pump operation if the room temperature falls below 46°F.

High Energy Efficiency

Provides high energy efficiency up to 28.2 SEER, 14.5 HSPF which reduces operating costs.

Inverter Technology

Panasonic inverter technology provides optimum power control and extremely efficient operation by modulating the compressor capacity. The result is efficient and flexible operation using less electricity.

Blue Fin Condenser

Condensers can take a beating from exposure to salty air, rain and other corrosive factors. Panasonic has extended the life of its condensers with an anti-rust coating.

4-Way Airflow Design Sends Cool Air in All Directions

Air is returned through the center of the grille, while evenly distributing air through each of the 4 supply air openings. Installation in the center of the room provides for the greatest comfort. However, 1 or 2 supply louvers can be closed for installation near 1 wall to provide 3 or 2 way airflow. Also, by closing off 1 supply louver.

Comfort/Quiet

Integrated Drain Pump

Drain pump is built into the unit to raise the condensate water up to 20" from the drain pump discharge to a gravity drain.

Multi-Zone Systems

Outdoor Units

See following pages for outdoor models specifications and combinations.

2 Zone (1.5 Ton) CU-2E18SBU-5

Cooling Capacity: 16,700 (7,200 - 20,000) Btu/hr.
Heating Capacity: 20,200 (7,200 - 24,600) Btu/hr.
SEER Non-Ducted 18.0 / Ducted 18.0
EER Non-Ducted 12.55 / Ducted 12.55

2-3 Zone (1.5 Ton) CU-3E19RBU-5

(Non-Ducted)

Cooling Capacity: 19,000 (6,100 - 24,800) Btu/hr.
Heating Capacity: 26,000 (5,000 - 28,400) Btu/hr.
SEER Non-Ducted 22.0 / Ducted 18.5
EER Non-Ducted 12.55 / Ducted 10.85
HSPF Non-Ducted 10.5 / Ducted 9.0

2-4 Zones (2 Ton) CU-4E24RBU-5

(Non-Ducted)

Cooling Capacity: 24,000 (10,200 - 31,400) Btu/hr.
Heating Capacity: 37,800 (14,300 - 48,500) Btu/hr.
SEER Non-Ducted 22.0 / Ducted 19.0
EER Non-Ducted 12.55 / Ducted 10.85
HSPF Non-Ducted 10.0 / Ducted 9.0

2-5 Zones (3 Ton) CU-5E36QBU-5

Cooling Capacity: 36,000 (9,900 - 39,000) Btu/hr.
Heating Capacity: 37,800 (11,600 - 49,500) Btu/hr.
SEER Non-Ducted 18.5 / Ducted 16.5
EER Non-Ducted 9.6 / Ducted 8.3
HSPF Non-Ducted 10.0 / Ducted 9.5

All multi split condensers must have minimum of two indoor units installed.

Advantages of Multi-Zone Inverter System

- Year-round comfort with Multi-Zone Heating & Cooling.
- Combine low-energy Inverter Technology and Ductless Zone Control for optimum energy efficiency.
- Cool and Heat 2-5 rooms or a whole house with one outdoor condenser and up to 5 ductless indoor units.
- Eliminate cost of duct installation and cleaning.

nanoe™X ClimaPure™ • nanoeX

- Built-in air and surface purification technology that provides a comfortable environment for occupants by reducing pollutants and odours.

Outdoor Unit Capacity: The System Capacity is the Cooling and Heating Capacity listed at the top of each Outdoor unit's specification chart.

Indoor Unit Demand: The Cooling and Heating Capacities are listed at the top of the specification chart of each Indoor Unit (see page 36 and 37). The total of these partial indoor capacities is the System Demand.

Now let's understand the term Diversity. Diversity is when the load in the conditioned space is not constant. For example the east side of a house has more direct sun and cooling load requirement in the morning and the west side has more direct sun and cooling load requirement in the afternoon.

A system sizing calculation that plans for diversity may size up to approximately 130% of indoor unit demand versus the outdoor unit's system capacity provided that planned operating demand throughout the day never exceeds 100% of system capacity. If there is no planned Diversity then the indoor unit demand should not exceed 100% of the outdoor unit capacity.

Therefore, a first step in sizing and selecting any multi-zone system is to understand the System Demand that the building requires before moving on to selecting Indoor unit combinations.

Panasonic Built-in Wi-Fi and App

A new built-in Network Adapter that allows you to control your heat pump from everywhere.

Available with ClimaPure™ XE Series

- CS-XE9WKUAW - CS-XE18WKUAW
- CS-XE12WKUAW - CS-XE24WKUAW
- CS-XE15WKUAW

Download from app store

Panasonic Comfort App
(free) Search for "Panasonic Comfort"

- Requires the APP to work with a smartphone with Android 4.4 and above, or iOS 9 and above. However, it can't be guaranteed that the APP will work well with all Android OS version.
- The Network Adapter is designed specifically as a terminal for Panasonic Comfort app.
- The Wireless LAN network coverage must reach the air conditioner installation location.

Specification

Network Adapter	Wireless LAN Module (built-in)
Model	DNSK-P11
Input Voltage	DC 5V (From Air Conditioner Indoor Unit)
Current Consumption	Tx/Rx max. 290/100 mA
Wireless LAN standard	IEEE 802.11 b/g/n
Frequency range	2.4 GHz band
Encryption	WPA2-PSK (TKIP/AES)

Maximum radio-frequency power transmitted in the frequency bands

Type of wireless	Frequency band	Max. EIRP (dBm)
WLAN	12 - 2472 MHz	20 dBm

App Instructions

<p>For Android user (Android 4.4 and above)</p> <ul style="list-style-type: none"> • Open GET IT ON Google Play • Search for "Panasonic Comfort." • Download and install. 	<p>For iOS user (iOS 9 and above)</p> <ul style="list-style-type: none"> • Open Download on the App Store • Search for Panasonic Comfort app. • Download and install.

Wi-Fi Adapter*

Internet Connect devices remotely control a system with one or more indoor units via the cloud. An Internet Control adapter is required for every indoor unit. Requires an internet connection and a Wi-Fi router, Control your equipment using any web browser, iOS or Android device.

 <p>USPA-AC-WIFI-1B</p>	<p>RAC Residential Wired Wi-Fi Adapter For compatible units, this Internet Control device is mounted next to the indoor unit and connects to the main board with the supplied cable. It can be used with wired and wireless remotes.</p>
 <p>USIS-IR-WIFI-1</p>	<p>RAC & PAC Residential and Light Commercial Wireless Adapter This universal Internet Control infrared (IR) hub can control any RAC or PAC indoor unit with the factory wireless remote or optional wireless kit. It can be used on a table top or wall mount to send IR signals to the unit.</p>
<p>All Internet Control features are included for free up to 50 indoor units. The Pro License is required to control 51 or more indoor units.</p> <ul style="list-style-type: none"> • On/Off • Heat, Cool, Dry and Auto Modes • Set Point Temperature • Adjust Fan Speed • Louver Direction (if applicable) • Ambient Temperature • AC Unit Error Signals, Codes and Descriptions • Multi-lingual Interface • Automatic Firmware Updates • Allows Multiple Users • Annual Schedule Up to 10 Timers and Scenes • Multiple Home/Zone Management • Multiple Home/Zone Management • Powerful and Energy Savings Models • Advanced User Functions • AC Unit Error Signals, Codes and Descriptions • Error E-mail Notifications • User Defined Alerts 	

Note: Not all features are available on all indoor models

Panasonic Comfort Cloud App – Internet Connect

Control your home's comfort with the smart Internet Control device via smartphones, tablet and PC and via the internet.

Offering the same functions as if you were at home or office: start/stop, mode operation, set temperature, room temperature etc. As well as the new, advanced functionality provided by internet control to achieve the best comfort and efficiency with the lowest energy consumption.

What's Internet Control?

Internet Control is a next generation system providing a user-friendly remote control of air conditioning or heat pump units from everywhere, using a simple Android or iOS smartphone, tablet or PC via web browser.

Simple Installation

Just connect the Internet Control device to the air conditioner or heat pump with the supplied wire and then link it to your Wi-Fi access point.

Internet Control. Easy to install. Maximum benefit

Internet Control is underlined with the slogan "Your Home in the Cloud," meaning a simple and easy to handle solution has been considered for every user to manage the device, not requiring any communication or computer skills.

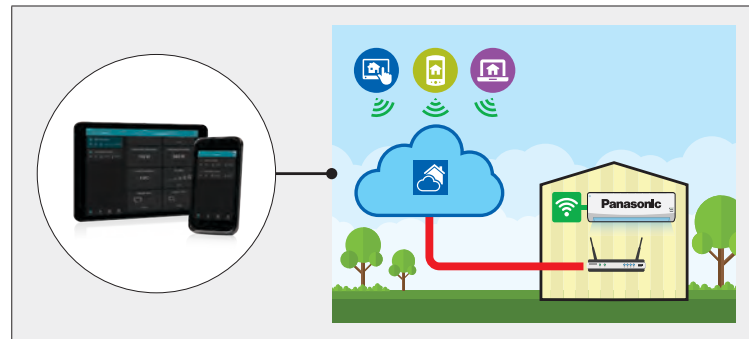

No servers. No adapters. No wires. Just a small box is needed to be connected and placed close to the air conditioning indoor unit and your smartphone, tablet or PC.

Your existing Wi-Fi connection does the rest when you are at home. Start the App from your smartphone device, your tablet or your computer, and enjoy a new experience in comfort. And if you are out of town, just launch the App, and manage the air conditioning of your home from the cloud.

An intuitive and user-friendly interface that lets you manage your air conditioning unit in the same way you do with the remote controller at home.

Internet control can be downloaded in from the **AppStore** or **PlayStore**.

* Use optional external Wi-Fi Adapter and App for Internet connection with all models. See Interface Controls list.

BACnet Integration

BACnet IP and MSTP Controller. Requires (1) device per indoor unit.	
 <p>USPA-AC-BAC-1</p>	<p>RAC Residential BACnet Controller This is a BACnet over IP or MSTP device. Configured using external dip switches. Includes an HTML based interface that can be used for additional control and BACnet network settings.</p>
 <p>USPA-RC2-BAC-1</p>	<p>PAC Residential & Light Commercial BACnet Controller This is a BACnet over IP or MSTP device capable of monitoring and controlling all generations of PACi, ECOi and ECOi EX units. Configured using external dip switches. Includes an HTML based interface that can be used for additional control and BACnet network settings.</p>
<p>The USPA-AC-BAC-1, USPA-RC2-BAC-1 all feature occupied/unoccupied heat and cool set points for reduced programming time and greater energy efficiency.</p>	
<p>Global and Individual Operation/Setting Objects</p> <ul style="list-style-type: none"> • All On/Off • On/Off • Mode • Setpoint • Fan Speed • Air Direction (n/a for ducted units) • Filter Sign Reset • Prohibit Thermostat Functions • Occupied/Unoccupied All • Occupied/Unoccupied Cool Setpoints • Occupied/Unoccupied Heat Setpoints • Run Time Consumption Reset • ECONAVI-Human detection (if available) 	<p>Global and Individual Monitor/Status Objects</p> <ul style="list-style-type: none"> • On/Off • Mode • Setpoint • Fan Speed • Air Direction (n/a for ducted units) • Space Temperature • Prohibit Thermostat Functions • Filter Sign Reset • Unit and System Error Codes • CZ-CFUNC1U Error Codes (BAC-128) • Occupied/Unoccupied Mode • Today, Yesterday and Total Run Time Consumption

Note: Not all features are available on all indoor models

LonWorks Integration

CZ-CLNC1U

The CZ-CLNC1U LonWorks Interface can control up to 16 indoor units. Monitors and controls all generations of PACi, ECOi and ECOi EX systems. Connects directly into the communication bus and is field-configured via dip switches.

The CZ-CLNC1U offers the following setting and monitoring objects. Some objects are not available on all indoor models.

Indoor Unit Operation/Setting Objects

- On/Off
- Mode
- Setpoint
- Fan Speed
- Air Direction (n/a for Ducted Units)

Indoor Unit Monitor/Status Objects

- On/Off
- Mode
- Setpoint
- Fan Speed
- Air Direction
- Space Temperature
- Unit and System Error Codes

RAC Connectivity to PACi, ECOi and ECOi EX

CZ-CAPRA1

This adapter serves as an interface required to connect a central control device, such as an intelligent controller, with the a room air conditioner. Using this adapter can operate or monitor the room air conditioner from a central control device. Panasonic room air conditioners equipped with the CN-CNT terminal are supported.

Features: The following operations from the central control device can be performed

- Operations to start/stop the room AC, switch to operation mode, and set the temperature, fan speed and fan direction (up/down).
- Monitor the operation status and abnormality of room air conditioner.
- Prohibiting the remote control operation of room air conditioner
- Using On/Off contact of external connection can start/stop the room air conditioner, prohibit/permit the remote control operation, and perform emergency stop. A coin timer or card key can also be contacted.
- Retrieving the operation signal of abnormal signal of room air conditioner. (An external power source (DC12V) is separately required.)
